- Modern, web-based platform

Why ISI Enterprise?
Common Business Drivers for Insurers

Business Driver	Why ISI Enterprise?
Product flexibility and agility	Highly configurable to support unique product structures and facilitate fast, simple changes without programming

Why ISI Enterprise?
Common Business Drivers for Insurers
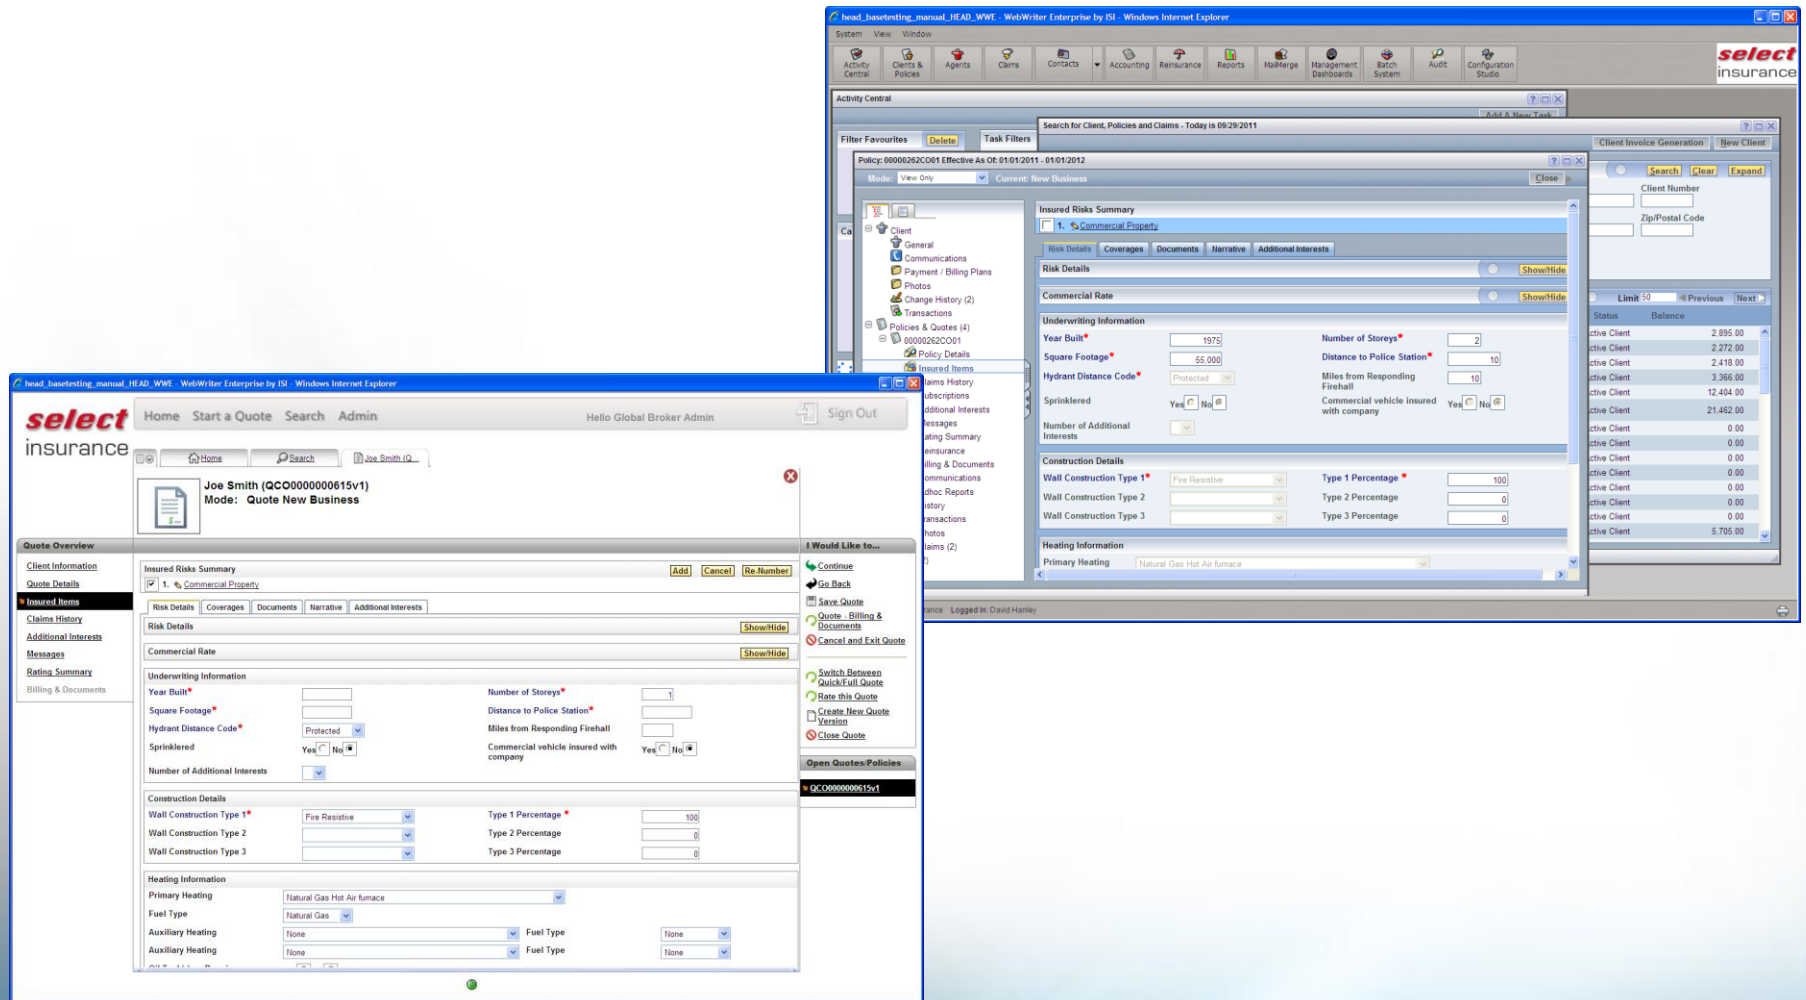

Business Driver	Why ISI Enterprise?
Product flexibility and agility	Highly configurable to support unique product structures and facilitate fast, simple changes without programming
Streamline distribution and collaboration with producers	Integrated producer portal allows for straight through processing and rules-based underwriting

Integrated Producer Portal

- *Single centralized source of rules and product configurations*

- *Real-time collaboration between producers and internal staff*

- *Both solutions on a single platform with no duplication or integration required*

Integrated Producer Portal

Intuitive Producer UI vs. Internal Power User UI

Why ISI Enterprise?
Common Business Drivers for Insurers

Business Driver	Why ISI Enterprise?
Product flexibility and agility	Highly configurable to support unique product structures and facilitate fast, simple changes without programming
Streamline distribution and collaboration with producers	Integrated producer portal allows for straight through processing and rules-based underwriting
Reduce system maintenance costs	Configurable, modern solutions require lower IT maintenance budget. All-in-one design eliminates integration costs.
